Profile

Frontend Software Engineer with strong production experience building modern, user-facing applications using React, TypeScript, and Next.js. Product-minded developer who thinks critically about UI, scalability, and user experience beyond pixel-perfect implementation. Comfortable working with ambiguity, iterating fast, and collaborating closely with designers and product teams. Uses AI coding tools as part of the daily workflow to accelerate delivery, improve code quality, and focus on higher-level decisions.

Professional Experience

Frontend Implementation / Web Developer — Freelance Projects

Sept 2025 - Actualidad

- Owned the full lifecycle of web projects, from requirements discovery and solution design to frontend development and deployment.
- Built and customized modern user-facing interfaces using Next.js, making deliberate decisions around layout, interaction and responsiveness to ensure visual consistency and scalable UI patterns.
- Worked autonomously in a project-based environment, iterating quickly on feedback and using AI-assisted tools as part of the daily workflow to accelerate development while maintaining code quality and product focus.

Frontend Developer (React Js & React Native) - totalcoin

Jul 2022 - Aug 2025

- Built and maintained production-grade web and mobile applications with a strong focus on user experience, performance, and maintainability.
- Designed and implemented reusable frontend components and patterns, contributing to a more scalable and consistent UI architecture.
- Worked closely with designers and product stakeholders to translate ideas into polished user-facing experiences, often pushing back or proposing alternatives when designs didn't scale well.
- Integrated frontend applications with API-driven backends, managing data flows, error states, and edge cases.
- Actively used AI tools to speed up development, iterate on solutions, and focus time on architectural and product decisions rather than repetitive code.

Systems Analyst – FLASH Postal Services

Aug 2020 - Jul 2022

Designed, developed, and optimized internal systems that digitalized and automated operational processes.

- Built a QR code generation and scanning system for package tracking, reducing management times by 70% and eliminating manual errors.
- Developed a platform using Google Maps API to monitor routes and deliveries in real time, improving timing and optimization of shipments and tracking.
- Implemented a staff attendance control system that automated the calculation of schedules, attendance, and absences, improving administrative management by over 60%.
- Applied the SCRUM methodology throughout the software development lifecycle, ensuring proper planning, control, and continuous improvement in projects.

Customer Support Representative – Teleperformance

Sept 2019 – Jul 2020

- Provided technical support for Internet, TV, and telephony services.
- Developed assertive communication, empathy, and effective problem-solving skills under pressure.
- Achieved high levels of customer satisfaction and consistently met performance metrics.

Technical Skills

- Frontend: React, React Native, TypeScript, JavaScript (ES6+), HTML5, CSS3
- Frameworks: Next.js
- Styling: Tailwind CSS, component-driven UI
- Architecture: Component composition, reusable patterns, separation of concerns
- APIs: REST, GraphQL basic
- Product & UX: Design collaboration, UI consistency, performance-oriented interfaces
- AI-Assisted Development: ChatGPT, GitHub Copilot (daily use for refactoring, iteration, and problem-solving)
- Collaboration & Workflow: Git, Jira, Figma
- Methodologies: Scrum

Education

- Information Systems Engineering (final exam in progress) – National Technological University Tucumán Regional Faculty (UTN-FRT)
- Leadership Course – Escuela de Oratoria y Liderazgo Argentina (February–May)
- React JS Professional Training (2022)
- Anglo Institute – English Course (2022, certified)
- Information Systems Analyst – UTN-FRT (2019)
- UTN-FRT – English Course (2014)
